360° Information Security Assessment

www.zdlgroup.com

360° Assessment

The 360° Assessment helps organisations identify an accurate security baseline and determine a strategy for reducing risk through prioritised recommendations and lowering the cost of remediation.

The assessment will reveal your vulnerability to common cyber security threats and provide an overall risk surface analysis for your business.

If you're looking to benchmark your security status, develop your security program, align to best practice (NIST) or get security certifications such as ISO 27001, the 360° Information Security Assessment provides the basis for understanding the steps required to achieve your goals.

Our Approach:

By engaging with your key people, reviewing documentation, and observing business processes our experienced consultants build up a detailed profile of the security controls present across your organisation. Following expert analysis of the findings, a report is crafted detailing your risk levels, identifying missing controls and providing expert commentary and analysis for improvements within each of the domains.

Post report, Stakeholders will be invited to join our consultant for a presentation highlighting key findings and to discuss recommendations on how to take those all important next steps.

We take a comprehensive deep dive analysis of over 900 security controls across 19 domains culminating in a report that delivers a detailed understanding of risk levels across security disciplines including Access Control, Human Resources, Physical Security, Asset Management.

Detailed assessment of controls to determine your organisation's vulnerabilities for common threats like:

Ransomware
Phishing

**Data Loss**

Malicious Insider

Denial of Service

"PD Ports has been working with ZDL on a number of projects since 2015. In that time they have provided us with a full 360° review of our internal processes which has enabled us to develop our cyber security strategy. Their in-depth assessment and review has enabled us to implement long-term solutions to ensure that our desired level of cyber maturity is reached and can be maintained."

Richard Ellison,
IT Manager – Governance, Risk & Compliance – PD Ports

Holistic approach

Categories (top to bottom): Asset Management, Risk Assessment, Supplier Risk, GDPR/DPA, Incident Management, Business Continuity, Organisational Security, Documentation, Technology Controls, Software Development, Access Controls, Comms and Ops, Physical Security, HR Security, Compliance, Cloud Services Consumer

Scale (left to right): Non-Existent, Initial, Repeatable, Defined, Managed, Optimised

Grouping: Identify, Prepare, Protect, Manage

Delivering Excellence in Cyber Security

At ZDL, we believe that effective risk management requires a holistic 360° approach. We take a comprehensive view of our clients' cyber security risks and provide quality services to address those risks.

Our approach to Total Security Management helps make our clients' infrastructure, applications and data more secure in the face of a continually evolving Threat Landscape. Our aim is to build a partnership with our clients, built on a mutual respect and understanding of each other's businesses. We become a part of our clients' team, a valued partner; an intrinsic part of their business.

ZDL's 4 key service areas are designed to focus on our clients' cyber resilience journey. Our unique portfolio of services enables you to build an agile, responsive security infrastructure and strategy.

Our Services

Ethical Hacking

- Broad Security Review
- Red Teaming
- Security Audits
- Penetration Testing
- Cloud Security & Security Ops Testing
- Source Code Review/Coding Standards
- Social Engineering
- Physical Security

Training

- Security Awareness Programmes
- Secure Coding School for Developers
- Bespoke Senior Exec Security Training
- Runbook training/ Scenario Workshops
- Phishing & Resilience Programmes
- Physical Security Awareness
- Online Assessment / CBT Developer Training

Managed Services

- Supplier Evaluation Risk Management (VenDoor)
- Incident Response Preparedness
- Security Training for Developers - Annual Programme
- Managed Detection and Response (MDR)
- Virtual Information Security Manager
- OSINT/Threat Intelligence

Compliance

- Policy Review & Creation
- 360° Assessment
- PCI Remediation Support
- ISO/ NIST/EU GDPR Standards Agreement
- Business Continuity Management
- IR Management Review
- ISO Readiness Programmes
- Office365 Configuration Review
